

Maya Train

SENER XTRANSPORTATION / XRAIL MAINLINE / XINTERCITY & COMMUTER RAIL / MEXICO

MAYA TRAIN

Cliente: FONATUR

País: Mexico

Sener provides the basic engineering services for the Maya Train, which will include freight and passenger rail service over a length of 1,460 km and 28 stations at an approximate speed of 160 km/hr. It will connect the main cities and tourist areas of the south-southeast region of Mexico, linking five of the states with the greatest tourism potential within the Mexican Republic, thus promoting the socio-economic development of the country through the tourism sector.
