

# MTG. SCA SCOE

SENER AEROSPACE & DEFENSE / SPACE / SPAIN

*MTG. SCA SCOE*

**País: Spain**

---

This equipment allows the testing and verification of the Meteosat Third Generation (MTG) sweep system. It consists of the electronic testing equipment, the mechanism simulation and the mechanism testing equipment.

The comprehensive user interface configures the tests and provides observability during the tests and reproduces the complementary function of the interfaces of the testing equipment.

This same equipment was used to fully verify the software of MTG SCA.
